

ADDENDUM

Alpert JS, Thygesen K, Antman E, Bassand JP, et al. Myocardial Infarction Redefined—A Consensus Document of the Joint European Society of Cardiology/American College of Cardiology Committee for the Redefinition of Myocardial Infarction. *J Am Coll Cardiol* 2000;36:959–69.

When citing this document, the American College of Cardiology requests the following citation format be used: Alpert JS, Thygesen

K, Antman E, Bassand JP, et al. Myocardial Infarction Redefined—A Consensus Document of the Joint European Society of Cardiology/American College of Cardiology Committee for the Redefinition of Myocardial Infarction. *J Am Coll Cardiol* 2000; 36:959–69.

PII S0735-1097(01)01177-9

CORRECTIONS

Kontos MC, Anderson FP, Alimard R, Ornato JP, Tatum JL, Jesse RL. Ability of Troponin I to Predict Cardiac Events in Patients Admitted from the Emergency Department. *J Am Coll Cardiol* 2000;36:1818–23.

Figure 4 printed on page 1821 is incorrect. The correct Figure 4, including the caption, appears below. The authors regret the error.

PII S0735-1097(01)01179-2

Figure 4. Comparison of the sensitivity of positive troponin I (open bars) and the ECG (solid bars) for predicting end points. Comp = significant complications; D = death; M = myocardial infarction; Sig = significant coronary disease.

Rodriguez A, Bernardi V, Navia J, et al., for the ERACI II Investigators. Argentine Randomized Study: Coronary Angioplasty With Stenting Versus Coronary Bypass Surgery in Patients With Multiple-Vessel Disease (ERACII): 30-Day and One-Year Follow-up Results. *J Am Coll Cardiol* 2001;37:51–8. The legends for Figures 2 and 4 were transposed. The correct legends for Figures 2 and 4 are as follows:

Figure 2. Kaplan-Meier curve: Freedom from repeat revascularization procedures (PTCR or CABG).

Figure 4. Kaplan-Meier curve. Freedom from death.

Furthermore, in the DISCUSSION section, page 56, 3rd paragraph, the acronym VANQWISH was incorrectly spelled out as “Estudio Randomizado Argentino Cirugia Angioplastia.” VANQWISH should mean the following: “Veterans Affairs Non Q Myocardial Infarction Study.”

OASIS Investigators. Effects of Long-Term, Moderate-Intensity Oral Anticoagulation in Addition to Aspirin in Unstable Angina. *J Am Coll Cardiol* 2001;37:475–84.

The names of the Oasis Investigators were not included in the printed article. Here is a complete list of the Oasis Investigators.

Clinical centres: *National Coordinator ‡Steering Committee Member
